SIMLA, SATURDAY, DECEMBER 4, 1954

Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 4th December 1954

Applications for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

18th November 1954

53158. N. V. De Bataafsche Petroleum Maatschappij. Process and apparatus for producing cold.

53159. The Dux Chemicals Solutions Company Limited. Rot-proofing cellulosic materials.

53160. D. Napier & Son Limited. Electric spark generators. (19th November 1953).

53161. Stichting Voor Fundamenteel Onderzoek Der Materie. Process for carrying out nuclear fission reactions.

53162. The Monotype Corporation Limited. Improvements in or relating to moulds for casting single-type bodies.

53163. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to a refrigerator comprising a space having a lower temperature and a space having a higher temperature.

53164. R. Schobelt. A method for producing moulds.

53165. O. Hinze. Upper chord locking device for falsework carriers. [Addition to No. 49980].

53166. Libbey-Owens-Ford Glass Company. Electrically conductive windshield.

53167. Mahesh Chander. Improvements in or relating to centrifugal pumps.

53168. Mahesh Chander. Improvements in or relating to self-priming centrifugal pumps.

19th November 1954

53169. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Drafting mechanism.

53170. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Improvements in or relating to drawing mechanism for textile spinning frames.

53171. SKF Kugellagerfabriken Gesellschaft mit beschränkter Haftung. Drafting mechanism.

53172. The Dow Chemical Company. Improvements in or relating to manufacture of methylstyrene.

53173. Dr. B. Joos. Improvements in or relating to process for the preparation of regenerative serums.

53174. Airflow (N'cle) Pty. Limited. A portable cooling unit.

53175. Painter Brothers Limited. Improvements relating to end and like connections for galvanised structural tubes and similar elements. (20th November 1953).

53176. Douglas Fraser & Sons Limited. Improvements in winding machines for yarn and the like. (21st November 1953).

53177. Aktiebolaget Svenska Flaktfabriken. An improved method and a device for air conditioning.

20th November 1954

53178. The Stanton Ironworks Company Limited. Improvements in joints in pipes.

53179. Chino In Gyogyszer Es Vegyeszeti Termek Gyara R.T. Process for the preparation of optically active *threo* β -(*p*-nitrophenyl)-serine and derivatives thereof.

22nd November 1954

53180. Bundy Tubing Company. Tube bending apparatus.

53181. F. S. Allinquant. Damped suspension.

53182. Kumbla Shantharama Mukunda Nayak and Kumbla Shrinivasa Mukunda Nayak. A circuit for improved transmission of electromagnetic waves.

53183. Siemens & Halske Aktiengesellschaft. Improvements in electric point machines.

53184. Metropolitan-Vickers Electrical Company Limited. Improvements relating to dynamo electric machines. (4th December 1953).

53185. J. F. Scholten & Zonen Curacao N.V. Apparatus for the examination of textile-threads.

53186. Ciba Limited. New nitro-dyestuffs and process for making them.

53187. Ciba Limited. Process for the manufacture of vat dyestuffs of the indanthrone series.

53188. S. Takakita, S. Takakita, M. Takakita, T. Takakita and A. Takakita. Breast of plough.

23rd November 1954

53189. W. P. Warner. Improvements in or relating to the picking or plucking of tea leaf or the like agricultural product.

53190. A. Schmid. Improvements in and relating to saddle pumps for bicycles and motorcycles.

53191. Durand & Huguennin A. G. New 4 : 4'-di-triazyl-di-aminostilbene-2 Z'-disulphonic acid derivatives and process for making them.

53192. Imperial Chemical Industries Limited. Improvements in the production of a wear-resistant surface on ferrous metal parts. (1st December 1953).

53193. The Dorr Company. Treatment of polluted liquids.

53194. Dr. Ing. E. Lackner. Prestressed bottom of trough-shaped structure.

53195. Council of Scientific and Industrial Research. Electrolytic preparation of para-aminophenol.

53196. Council of Scientific and Industrial Research. Manufacture of upholstery leathers.

53197. Council of Scientific and Industrial Research. Process for the manufacture of tanned skins.

53198. Council of Scientific and Industrial Research. Manufacture of basic aluminium chloride.

53199. Council of Scientific and Industrial Research. A process for the isolation of the alkaloids of *rauwolfia densiflora* benth.

24th November 1954

53200. M. A. Chaudary. Improvement in and relating to making of fabric from cotton, wool, silk, linen and like fibres.

53201. N. V. De Bataafsche Petroleum Maatschappij. A method for carrying out chemical reactions in the gaseous phase. (27th November 1953).

53202. Timbrol Limited. Improvements in the purification of 1, 1, 1-trichloro-2, 2-bis(4-chlorophenyl) ethane. (11th December 1953).

53203. The General Electrical Company Limited. Improvements in or relating to the manufacture of permanent magnets. (2nd December 1953).

53204. Westinghouse Brake & Signal Company Limited. Improvements in or relating to ball valves. (5th January 1954).

53205. Brentford Electric Limited and J. Gray. Improvements in or relating to heat pumps. (15th October 1954).

53206. S.A.I.C.A. Societa Anonima Italiana Colori Affini. Process for the preparation of dyestuff emulsion and their application to the dyeing and printing of cloth and textile fibres.

Alteration of Date

49773. The claim to priority date 2nd July 1952 has been abandoned and the application dated as of 22nd June 1953, the date of filing in India.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Manager of Publications, Civil Lines, Delhi, and also on cash payment at the counter of the Government of India, Central Book Depot, 8, Hastings Street, Calcutta in the course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of the specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office, on payment of the necessary charge which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

49060. Chemical Construction Corporation. Improvements in or relating to separation of nickel and cobalt from acidic solution. (9th May 1952). Accepted on 19th November 1954.

The acidic solution of the metals is treated with a reducing gas at above 120°C. Said treatment being carried out in three stages so as to effect selective separation nickel and cobalt.

49117. PERFOGIT Societa per Azioni. Process for the production of delustered structures from polymers. Accepted on 24th November 1954.

Adding titanium hydroxide gel obtained by hydrolysis of titanium dioxide to starting materials.

49582. Standard Oil Development Company. Improvements in or relating to inhibition of corrosion. Accepted on 20th November 1954.

Comprises an aqueous solution of a metal phosphate, phosphoric acid and a compound selected from the class consisting of alkali metal nitrates, chlorates and nitrites.

49590. Council of Scientific and Industrial Research. Improvements in or relating to the manufacture of fruit juice products. Accepted on 22nd November 1954.

Wherein before drying the pasty mass is reduced to forms such as shreds, flakes, pellets or the like.

49614. International Business Machines Corporation. Apparatus for transferring pulse information. (16th October 1952). Accepted on 22nd November 1954.

Using one or more bi-stable magnetic storage elements coupled by a transfer circuit to a voltage responsive device, said transfer circuit containing a uni-directional current controlling element for discriminating against voltage pulses.

49615. The Carborundum Company. Waterproofing sandpaper and methods of manufacturing the same. Accepted on 23rd November 1954.

Preparing a paper sheet in which fibres are bonded together by an elastomer, applying the making coat directly to the paper followed by the abrasive grains and sandsize.

49629. British Telecommunications Research Limited. Improvements in or relating to telephone or like systems. (27th May 1952). Accepted on 24th November 1954.

There is provided a spring acting on the bridge operating member which acts in response to an electromagnet.

49656. The General Electrical Company Limited. Improvements in or relating to electrical devices having envelopes fitted with caps. (5th June 1952). Accepted on 24th November 1954.

Neck of the envelope is formed by blowing heat softened glass into surrounding mould formed with inverse keys, for moulding keys to engage with inverse keys on the cap, and maintaining reduced pressure at the surfaces of the keys of the mould.

49695. PERFOGIT Societa per Azioni. Process for the preparation of terephthalic acid. Accepted on 24th November 1954.

Toluene is chloromethylated and the chloromethyl toluene is converted to terephthalic acid.

49773. Imperial Chemical Industries Limited. Alkyd based emulsion paints. Accepted on 24th November 1954.

Comprising dispersion of an air-drying oil-modified alkyd resin in aqueous phase containing protective colloid the resin has acid value of 15 which is reduced by 15 to 35 units during soap formation.

49874. The Mond Nickel Company Limited. Improvements relating to the heat-treatment of nickel-chromium-cobalt alloys. (9th July 1952). Accepted on 18th November 1954.

The heat treatment is carried in three stages at three different temperatures.

50094. Dr. C. Otto & Comp., G.m.b.H. Improvements in or relating to the treatment of blast furnace gas and the constituent matters contained as produced on smelting ores in a low-shaft furnace. Accepted on 23rd November 1954.

Passing the heated gas at a temperature of 700°C through a hot filter having a solid filling.

50107. Standard Telephones and Cables Limited. Improvements in or relating to trigger circuits. (17th February 1953). Accepted on 22nd November 1954.

Comprising a second harmonic transformer arrangement capable of change-over from one output condition to a second output condition in response to the arrival at an input of an electrical pulse.

50123. E. Gretener. Apparatus for simultaneous projection of a plurality of images composing a television image. [Addition to No. 45747]. Accepted on 22nd November 1954.

Simultaneous projector for black-and-white and three colour component pictures constituting a television picture having means for reducing the sharpness of the colour component pictures in a direction normal to the scanning lines.

50124. E. Gretener. Apparatus for forming the key in enciphering devices. Accepted on 22nd November 1954.

Key formed depending upon continuously permuted position of stepwise rotatable elements having same circular pitch and on ordered cascade-like group is formed by combining a part at least of said elements, stepwise by rotation of the respective higher elements with said group being effected depending upon the position of all lower elements of the group, respectively.

50139. L. Gruber. Screw-on closure for containers. Accepted on 22nd November 1954.

Comprising a screw-on cap having a central opening in its top, a sleeve type inner member made of a compressible material, the edge of the bottle-neck being provided with plurality of radial ribs.

50255. Ciba Limited. Process for the manufacture of new thiono-pyridazines. Accepted on 19th November 1954.

Replacing oxo-group in 1-alkyl-6-oxo-1 : 6-dihydropyridazone by sulphur.

50318. Graetz Kommandit-Gesellschaft. Improvements in and relating to incandescent hurricane lamps. (20th August 1953). Accepted on 24th November 1954.

Characterized in that bottom edge of lower casting bears partly on fuel container.

50367. The Monotype Corporation Limited. Improvements in or relating to sheet-feeding mechanism for photo-composing machines. Accepted on 22nd November 1954.

Comprising cylindrical support for light-sensitive sheet with sheet-registering devices.

50491. The Dow Chemical Company. Improvements in or relating to process of making readily dyable compositions and the compositions prepared in accordance therewith. Accepted on 23rd November 1954.

Incorporating in a fibrous product during its manufacture and before it is dried at least 1 per cent of a dye assistant.

50540. Hugh Wood & Company Limited. Improvements in or relating to means for indicating faults on electrically driven conveyor systems. (17th December 1952). Accepted on 19th November 1954.

With means indicating operation of each of the protective devices which is separate from other or others, the means failing to indicate belt-slip under normal conditions of stopping, or at starting, of the conveyor.

50541. Hugh Wood & Company Limited. Improvements in or relating to electrically operated signalling systems. (14th March 1953). Accepted on 19th November 1954.

In circuit with signalling wires there is means operative, with the wires out of contact with each other to maintain the signalling device inactive and on failure of the wires to actuate the signalling device and opening of control circuit of driving motor of conveyor, haulage or other installation.

50710. Ciba Limited. Process for the manufacture of butyl p-allyloxy-thiono-carbanilate. Accepted on 19th November 1954.

Reacting p-allyloxy-phenyl-isothiocyanate with butyl alcohol.

50727. Wingfoot Corporation. Improvements in brake with mild steel return spring. Accepted on 23rd November 1954.

A movable block and a return spring for the block having low resistance to permanent set and capable of assuming a plurality of progressively shorter lengths as it is stressed beyond yield point.

50967. Imperial Chemical Industries Limited. A process relating to the treatment of goods containing cotton. (20th January 1953). Accepted on 18th November 1954.

Passing through hydrocarbon or chlorinated hydrocarbon solvent bath and then through aqueous alkaline solution of peroxygen compound.

51406. Simon-Carves Limited. Improvements relating to sink-and-float coal or ore washing plants. Accepted on 20th November 1954.

Comprising a bath to which raw material is added, vertical dirt wheel for removing sinks and means to travel floats across the bath.

51412. American Cyanamid Company. Improvements relating to new mono thiophosphate esters and to miticide compositions containing same. (9th November 1953). Accepted on 20th November 1954.

Oxidising a O, O-dialkyl S-(1, 2-dicarbalkoxyethyl) dithiophosphate ester.

51578. Andre Rubber Company Limited. Improvements in or relating to resilient torsion joints. (16th November 1953). Accepted on 24th November 1954.

Either or each of the interior boundary of the outer member and the exterior boundary of the inner member comprise a plurality of shims upon which the elastomeric materials roll and bear against.

51616. Hoganas Billesholms Aktiebolag. Method and apparatus for the manufacture of fibres of an inorganic thermoplastic material. (26th March 1954). Accepted on 24th November 1954.

Subjecting the fibres first to a vertically directed stream of air and then to a horizontally directed stream of air followed by coating with a liquid binder or lubricant.

51617. Hoganas Billesholms Aktiebolag. Method and an apparatus for a uniform distribution fibres on a conveyor belt. (26th March 1954). Accepted on 24th November 1954.

Subjecting the stream of fibres into a vertical pit where the fibres are directed downwards by vanes oscillating in such a manner that the fibres are distributed uniformly over a conveyor belt placed at the bottom of the pit.

51666. Stamicarbon N. V. Apparatus for continuously carrying out reactions employing solid substances in the fluidised state. Accepted on 24th November 1954.

Comprises two or more vertical chambers in series in which finely divided solid material is maintained in the fluidised state, said chambers being provided with paths for passage of gas therethrough.

51721. Sir James Farmer Norton & Company Limited. Improvements in wire drawing and winding machines. (28th April 1953). Accepted 23rd November 1954.

Comprising a wire drawing block, means to revolve the same, a wire collecting block to be driven in unison with drawing block to receive coils of wire, the collecting block being removable from its service position.

51722. A. Talalay, W. D. Coffey and J. A. Talalay. Improvements in and relating to cellular products comprising rubber and to methods of making the same. (13th October 1953). Accepted on 23rd November 1954.

A deposit of stiffening material upon the internal cell wall surface of the individual cells.

51738. The Monotype Corporation Limited. An improved method of an apparatus for making corrections, alterations and additions on a photo-type composed film or sheet. Accepted on 23rd November 1954.

Comprising cutting emulsion-bearing component of stripping film around required matter, positioning a transfer strip and adhesively attaching the cut-out portion to it, stripping off portion to be replaced and applying the transfer strip to the film so that the required matter bearing portion of stripping film occupies the space vacated by the portion of the original film removed.

51752. E. J. Penfold. Improvements in or relating to air conditioning apparatus. (23rd April 1953). Accepted on 19th November 1954.

A damper controls proportion of fresh air entering the device.

51756. Standard Telephones and Cables Limited. Radar observation training device. (15th May 1953). Accepted on 23rd November 1954.

Consisting of a viewing screen scanned by a beam of ultra violet rays, a carrier of luminescent target-image located adjacent said screen to intercept said beam and means for moving said carrier parallel to said screen.

51781. Sandoz, A.G. Process for the preparation of derivatives of D-lysogenic acid. Accepted on 22nd November 1954.

Condensing an azide R-CO-N, where R stands for D-lysogenic acid or D-isolysogenic acid residue, with ethylamine.

51786. The Carborundum Company Limited. Improvements relating to the superstructure of tunnel kiln cars. (29th May 1953). Accepted on 24th November 1954.

Of the type comprising a number of pillars supported and located on the car base with each pillar formed of a number of superposed parts and with supports for setter tiles or bats at desired heights.

51790. Sandoz A.G. Process for printing textile materials. Accepted on 24th November 1954.

By printing with a medium based on aqueous viscose solutions containing dyestuffs, the prints then treated to convert the soluble viscose into insoluble cellulose.

51966. Merck & Co., Inc. New antibiotic agents. (11th July 1953). Accepted on 22nd November 1954.

Cultivating streptomyces garyphalus in a nutrient medium.

52176. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Process for the manufacture of a polyene aldehyde. Accepted on 22nd November 1954.

Reacting β -C₁₄-aldehyde with trialkyl ester of lower ortho-alkanoic acid to produce β -C₁₄-acetal, reacting the latter with vinyl lower alkyl ether and then with propenyl lower alkyl ether to produce β -C₁₄-diether-acetal which is hydrolysed.

52205. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to a method of applying light-diffusing layers to glass surfaces and glass objects obtained by carrying out this method. Accepted on 24th November 1954.

Glass surface is subjected to gasceous oxidation products of phosphorus while depositing magnesium oxide.

52384. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to slag forming bodies for use in butt-welding. Accepted on 22nd November 1954.

A slag forming body having an opposing cavity with an aperture larger than the cross-section of the pin and a volume larger than the volume of the pin which penetrates the body after local softening.

52395. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to electrically-conductive slag-forming bodies for use in butt-welding. Accepted on 22nd November 1954.

Electrically-conductive slag forming body characterised in that the electric conductivity of the body necessary for the ignition of the arc flame when the welding current is switched on is brought about by the presence of reduced titanium dioxide.

52478. Universal Oil Products Company. Process for concentrating hydrogen. Accepted on 20th November 1954.

Contacting with liquid absorbent in absorber, removing hydrogen-rich gas from absorber, removing enriched absorbent and flash vaporizing absorbed therefrom in high pressure zone and then in low pressure zone.

52479. The Indian Oxygen & Acetylene Company Limited. Improvements in or relating to fluid actuated valves. (5th August 1953). Accepted on 20th November 1954.

Comprising an inlet chamber, an outlet chamber having vent for the discharge of compressed fluid, a movable element separating the inlet chamber from outlet chamber and adapted to close the vent, and a unidirectional valve mounted on the movable member.

52502. Sarashi Charan Bhaumik. An automatic train protecting and controlling system. Accepted on 26th November 1954.

Current of predetermined value circulating between a generator, electro-magnetic relays of train apparatus locks signals of a track section when it is clear; deviation in value of current operates additional relays for applying brakes and cutting off power supply.

52623. Imperial Chemical Industries Limited. Electric igniters. (30th October 1953). Accepted on 24th November 1954.

Comprises a tubular casing of ductile material containing a plastic charge and an electric fuse.

52646. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to gas-fractionating devices. Accepted on 24th November 1954.

The separated low boiling fraction is condensed and by means of a vapour bubble pump effect the condensate is supplied to the column.

52670. Council of Scientific and Industrial Research. Enzyme bates for leather manufacture. Accepted on 20th November 1954.

Growing the mold in a culture medium containing tapioca flour.

52716. C. B. Goff. Automatic mechanical signal wire compensator. Accepted on 19th November 1954.

Comprising a cogwheel fixed to the chain wheel along which passes a signal wire, an operating rack connected to the signal, a guide for moving the chain wheel up and down and a counter weight suspended from the chain wheel.

Opposition Proceedings

The opposition entered by Inventors' Industrial Corporation Limited, to the grant of a patent on application No. 45985, as notified in Part III, Section 2, of the Gazette of India dated 27th June 1953 has been allowed in part. A patent will be sealed subject to amendment of the specification.

Printed Specifications Published

A limited number of printed copies of the undenoted specifications are available for sale from the Manager of Publications, Civil Lines, Delhi or on cash payment at the counter of the Government of India, Central Book Depot, 8, Hastings Street, Calcutta, at two rupees per copy:—

46403.	46479.	46489.	46518.	46581.	46617.	46663.	46681.

Amendment Proceedings

The amendment proposed by N. V. Philips' Gloeilampenfabrieken in respect of Patent Application No. 50394 as advertised in the Gazette of India, Part III, Section 2, dated the 14th August 1954 has been allowed.

Registration of Assignments, Licences, Etc.

Assignments, licences or other transactions affecting the interests of the original patentees have been registered in the following cases. The number of each case is followed by the names of the parties claiming interest:—

33053. George Royston & Son Limited.

33053. Doughlas Buckley Royston.

42179. The Electric Storage Battery Company.

45556. Edward Day Andrews.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The dates shown in each entry is the date of registration of the design included in the entry.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

Class 1 No. 79588. M. Y. Asim & Co. Indian Firm, 324, Bhendi Bazar, Bombay-3, "Spoon", August 7, 1954.

Class 1 No. 80233. (Mrs.) Clarice Kichler Robert, of Great Eastern Hotel, 1 to 3, Old Court House Street, Calcutta 1, India, Indian, "Coffee filter", October 18, 1954.

Class 1 No. 80234. Mrs. Clarice Kichler Robert, of Great Eastern Hotel, 1 to 3, Old Court House Street, Calcutta-1, India, Indian, "A component part of a coffee filter", October 18, 1954.
